

#8150

4.5" DIAMOND GRINDING WHEEL

Lasts More Than 20X Longer Compared to Standard Grinding Wheels

Diamond abrasive products are more expensive to manufacture than standard abrasive disks. However, they last longer and perform better while maintaining their size and shape throughout their cutting life. The 4.5" Diamond Grinding Wheel's innovative, three-dimensional contour allows for fast cutting, back cutting, gully cutting and bead finishing with far less sparks and odor. The #8150 is a professional solution for professional metal workers.

Features and Benefits

- Lasts a minimum of 20X longer than traditional grinding wheels
- Maintains diameter and shape throughout life of wheel
- Long lasting, cleaner, and faster cut
- Low sparks, odor and debris
- Saves time and cost

**SATISFACTION
GUARANTEED**

Specifications

Contour Type: 29
Size: 4.5" Diameter
Material: Industrial
Diamond Abrasive
Speed: 14,000 rpm max.
Arbor: 7/8" with 5/8" adapter

Applications: For use on all ferrous metals, concrete and ceramic.
Can also be used on aluminum with proper lubrication.

**Diamond for Extreme
Grinding Life**

**Thin Profile for
Deep Cutting**

**Coated Back Edge for
Hard-to-Reach Areas**
