

NEW PRODUCT RELEASE

#9060

MOBILE TIRE PRESSURE EQUALIZER

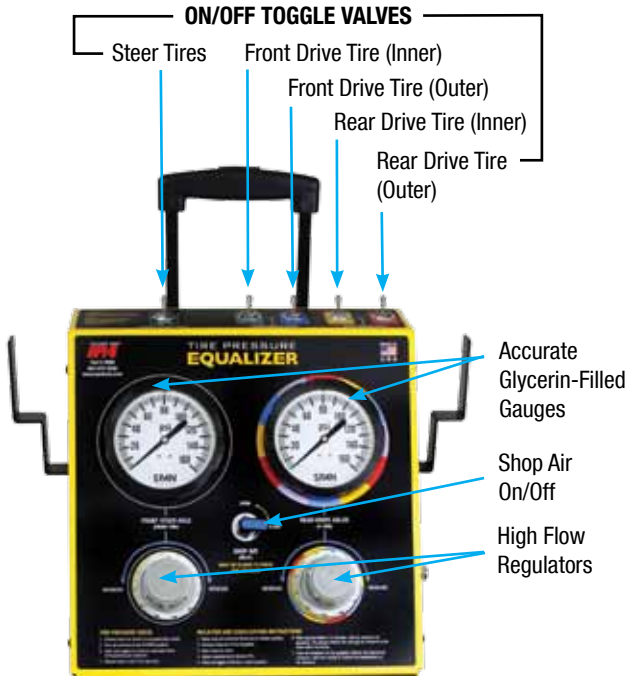

Five Tire, High-Flow, Dual Regulator, Pressure Equalizer System

Features and Benefits

- Inflate/deflate/equalize up to five tires at once
- Prevents blowouts and tire decapitation
- High-flow, dual regulator system for front and rear tires
- Increase fuel mileage and tread life
- Internally maximized hoses and ports for optimum air volume
- Glycerin-filled, large, highly accurate, pressure gauges

Specifications

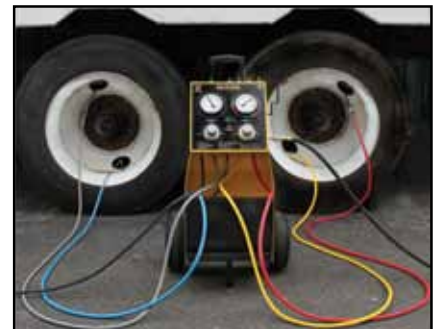

- Range: 0-140 PSI Working Pressure
- Gauges: 3.5 in., Glycerin-Filled**
- Regulators: High Flow, Adjustable
- Cart: Powder-Coated Steel
- Hoses: 3/8 in. ID Pneumatic (Grey, Blue, Yellow, Red 8 ft.; Black 20 ft.)*
- Tires: 10 in. Pneumatic
- Made and Assembled in the USA

Includes

- Five Color-Coded Air Hoses
- Two Panel-Mounted, High-Flow Regulators
- Two Panel-Mounted, High-Accuracy Air Gauges and Regulators (6-Month Recertification Available)**

*Air chucks NOT included. **Gauges are NIST Traceable

*Inflate and equalize steer and drive tires simultaneously.
#TEQ-5HLTC Lock-On Tire chucks are available separately.**

The Mobile Tire Pressure Equalizer provides a new, fast and efficient method to accurately read and inflate tire pressure on multiple tires (up to five) at the same time. When added to your preventive maintenance and safety lane procedures, the Mobile Tire Pressure Equalizer will help maximize fuel mileage, extend tread life and reduce risk of blowouts.

Unlike other tire pressure systems, the Mobile Tire Pressure Equalizer is equipped with two integrated, high-capacity air regulators, and two accurate, high-resolution, glycerin-filled, pressure gauges for consistent and precise tire pressure readings. It is engineered to save time and money with all internal components optimized for the fastest possible inflation and deflation times.
