

#9080 DIESEL-FUEL INJECTION CLEANER AND PRIMER

Cleans, Primes and Troubleshoots Diesel Injection Systems

The Diesel-Fuel Injection Cleaner and Primer has a unique, ultra-portable design that comes with an internal 12 volt DC fuel pump operating between 7-9 psi, five-gallon tank, coiled fuel hose, eight base adapters including Compucheck® and a flexible fluid dispensing adapter for filling fuel filters.

Features and Benefits

- Cleans, flushes, primes and helps air-bleed fuel injection systems
- Performs fast, airless priming of a diesel pump while holding fuel delivery pressure
- Delivers clean fuel or fuel additive for injector cleaning
- Fully portable for roadside service
- Helps isolate fuel system problems
- Fills fuel filters without a mess
- Control panel features missile power switch, fuel pressure gauge and volt meter
- Built on a rugged, mobile, steel platform
- 5-gallon HDPE tank (High-Density Polyethylene)
- For multiple fluid types; not gasoline
- Eight standard adapters, including Compucheck®
- All other adapters available upon request
- Made and assembled in the USA

Specifications

Battery Type: 12V Motorcycle-Type, Group 14, Yuasa YTX14 or Similar (Battery Not Included)

Flow Rate: 27 gph/101 lph

Pressure: 7-9 psi

Dry Weight: 27 lbs.

Capacity: 5 Gallons

Hose Length: 10' Coiled

Dimensions: 12 3/4" W x 15 1/2" H x 13 1/4" D

8 Adapters Included:
