#8045

## PLOW TERMINAL CHASER™ SET

### Restore Power and Eliminate Intermittent Plow Electrical Failures Fast

Cold weather, road salt, calcium chloride, moisture and voltage quickly corrode snowplow electrical connectors, causing voltage drop, intermittent operation and costly downtime. Even recently installed connectors can develop corrosion in just days.

The #8045 Plow Terminal Chaser™ Set is the original patented tools designed to clean, restore, and rejuvenate round-pin snowplow connectors commonly used on electro-hydraulic, grill-mounted plow systems. This 3-piece professional cleaning set removes corrosion from both male and female terminals, restoring reliable electrical contact and extending the life of expensive connectors and harnesses.

Designed for technicians and fleet maintenance professionals, the #8045 works on power, ground, and signal terminals found on Minute Mount® and similar plow connector systems, allowing fast, reliable repairs without unnecessary connector replacement.

#### Features and Benefits

- Cleans and restores male and female round-pin plow connectors
- Compatible with Fisher®, Western®, Meyer® and similar type snowplow connector systems
- Removes corrosion to restore conductivity and eliminate intermittent failures
- Helps prevent voltage drop and erratic plow operation
- Extends connector and harness service life
- Works on power, ground and signal terminals
- 3-piece set covers multiple terminal sizes
- Includes premium leather-style holster with magnetic clasp
- Patented design

#### Includes

- .090 M/F Fisher/Western Terminal Chaser™
- .160 M/F Fisher/Western Terminal Chaser™
- .250 M/F Fisher/Western Terminal Chaser™
- Quality Leather Holster
