RELAY BYPASS SWITCH KIT

Energize a Fuel Pump with the Push of a Switch

The relay bypass switch plugs in place of the fuel pump relay and provides direct control over the fuel pump circuit. It can be used to actuate the fuel pump when the engine is not running, allowing the fuel pressure to be read. Operating range: 20A (12V).

Features and Benefits

- Actuates fuel pump when the engine is not running
- Plugs in place of relay
- Controls fuel pump independent of “key on” systems
- Operating range: 20A (12V)
- Covers most domestic, Japanese, Korean, and German applications

Includes

Small Spade, Medium Spade and Large Spade Relays

Small Spade Relay
2000 and Newer Domestic,
Korean, and Japanese

Medium Spade Relay
Domestic and Japanese
1970-2009
