TIRE COMPARATOR™ TYPE III

TIRE COMPARATOR

A Professional "Go/No Go" Tire Caliper for Dual-Tire Pairing

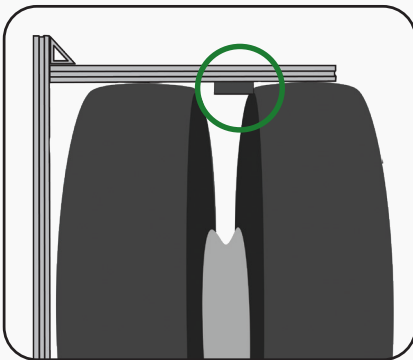

The Tire Comparator™ Type III makes tire pairing on light-duty parcel trucks faster and more accurate than ever before! The simple-to-use, 1/4" sliding tolerance gauge requires no measuring, guessing, or even visual inspection and allows for instant tire pairing in dual-wheel arrangements. To use, simply hold it against the tire, and slide across the treads. If the tolerance gauge fits between the comparator arm and the tire tread, the mated tires fail inspection.

Features and Benefits

- Fast, simple-to-use, no measuring and no guessing
- Extends tread life and improves fuel mileage
- Reduces blowouts and tire decapitation
- For mated tires with 1/4" overall tolerance
- Tire mating gauges for any rim size
- Magnetic plates for easy storage
- Light weight and portable
