

BrushAll® DIAMOND CUT-OFF AND GRINDING WHEELS

Virtually Indestructible! Last 60X Longer than Standard Grinding Wheels.

The **BrushAll®** Diamond Cut-Off and Grinding Wheels utilize a unique, core bonding technology that outlasts and outperforms traditional abrasives while providing unmatched access and versatility. Diamond particles are attached directly to the steel cores with the diamond particles fully exposed for maximum grinding/cutting performance and longevity. This helps the wheel maintain its size and shape throughout its cutting life, ensuring consistent reach and performance while lasting 60 times longer than standard abrasives. It also reduces the sparks and debris from use for faster and safer cutting.
