GREASE JOINT REJUVENATOR® PROFESSIONAL MODEL

Uses Light-Viscosity Oil and Pressure Generated by Tapping on the Piston to Open Clogged Joints and Fittings - Includes 5" Flex Hose, Coupler and Case

Save time and protect your equipment! The Grease Joint Rejuvenator® Professional Model uses light-viscosity oil and pressure to open clogged joints and fittings in minutes - no heat, disassembly or hours of work are necessary. Includes a hose for hard-to-reach spots and an extra coupler in a blow-molded case.

The Grease Joint Rejuvenator® cleans the joint by forcing any light-viscosity oil in through the fitting. Just fill the tool's body with oil, connect to the Zerk fitting, and gently tap repeatedly to pressurize the oil and force it into the joint, until the new oil has fully displaced the old, hardened grease. Like magic, all of a sudden you will feel the joint open and the joint or pin can then be greased. A must-have tool for excavators, dozers, loaders, backhoes, tractors, implements, shafts, or bearings.

Features and Benefits

- Instantly opens clogged grease joints
- Versatile use across farm, construction, lawn care, excavation, manufacturing, machine shops, well-drilling rigs, trucks, trailers and marine drivetrains
- Lubricates and clears blockages in bearings, control arms, king pins, piston arms, shafts, bushings and more
- Backed by a lifetime warranty
- Patented design; Made in the USA

Includes

- 5" Flex Hose and Extra Grease Coupler
