TDC INDICATOR STANDARD 6.25" (14MM THREADED)

Stop the Guessing and Easily Set a Piston to TDC

The Standard TDC Indicator enables a technician to accurately set a piston to Top Dead Center (TDC). Just remove the spark plug, screw in the gauge and rotate the engine while observing the radial marks on the sliding shaft and note the top of the piston stroke.

Features and Benefits

- Accurately displays piston movement
- 6 1/4" long (14mm thread) with 1/8" gradient marks
- Installs as easily as a spark plug
- Made of 1144 steel alloy with a stainless-steel spring
- Made in USA
- Lifetime Warranty

DO NOT use on an engine that has an acute spark plug angle relative to the flat top of the piston or you may bend the TDC shaft.
