WHISTLE ALERT (RIGID OR FLEXIBLE)

No More Burning Fingers and Hands! Just Listen for the Whistle to Find the TDC Compression Stroke.

The IPA® Whistle Alert (#7882) screws into a spark plug hole to quickly indicate compression stroke. Use the flexible model (#7894) for hard-to-reach places where the rigid version would be difficult or impossible to place.

Features and Benefits

- Eliminates the need for an extra hand
- After installation, your hands are free to complete the job
- Excellent for use on deep, recessed spark plug threads
- Made in the USA
- Lifetime Warranty
- Available in Rigid (#7882) and Flexible (#7894)
