# AIR COMB®

## FILTER & RADIATOR CLEANER

**90° Multi-Port Air Gun Blasts 5X More Air to Clean Filters,  
Radiators and Condensers Without Damage  
High-Volume Airflow Available in 4 lengths**

The **Air Comb®** is specially designed to maximize air pressure and volume through five 90° ports to thoroughly and safely clean air filters, condensers, radiators and more. Available in four sizes (12", 24", 36" and 48"), each Air Comb® provides long-reaching, high-pressure air power that will extend your filter's life without damage. Its slim profile is narrow enough to fit between a radiator and condenser, making it ideal for trucks, heavy equipment, HVAC systems, agricultural machinery and industrial maintenance. Built from durable anodized aluminum, the Air Comb® is lightweight and corrosion-resistant. Extend filter life, improve airflow and reduce downtime with this essential maintenance tool.

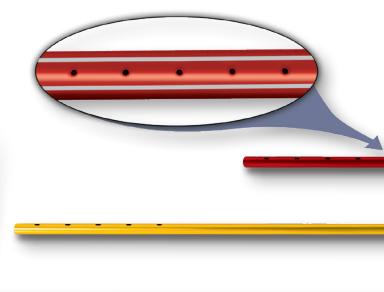

The Air Comb® is perfect for cleaning: semi-truck radiators, skid steers, combines, excavators, backhoes, forklifts, dozers, HVAC rooftop units, industrial compressors and cooling towers.

### Features and Benefits

- 5X Air Volume Output: Multi-port nozzle delivers maximum cleaning power without damaging delicate fins or filter media
- Slim 90° Profile: Reaches tight spaces between radiators and condensers that standard air tools can't access
- Anodized Aluminum Construction: Lightweight, durable, and corrosion-resistant for long-term use in tough environments
- Available in 4 Lengths: Choose from 12", 24", 36" or 48" models to match your reach and equipment needs
- Versatile Applications: Ideal for cleaning HVAC coils, truck radiators, heavy equipment, agricultural machinery and more

OSHA Safe

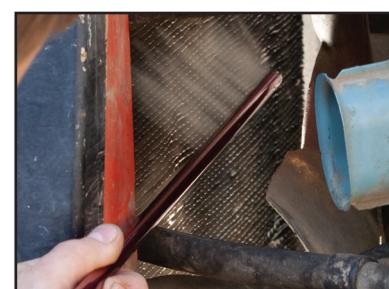

#8050 - 12"

#8051 - 24"

#8052 - 36"

#8053 - 48"
