SPADE-RELAY TERMINAL CHASER™

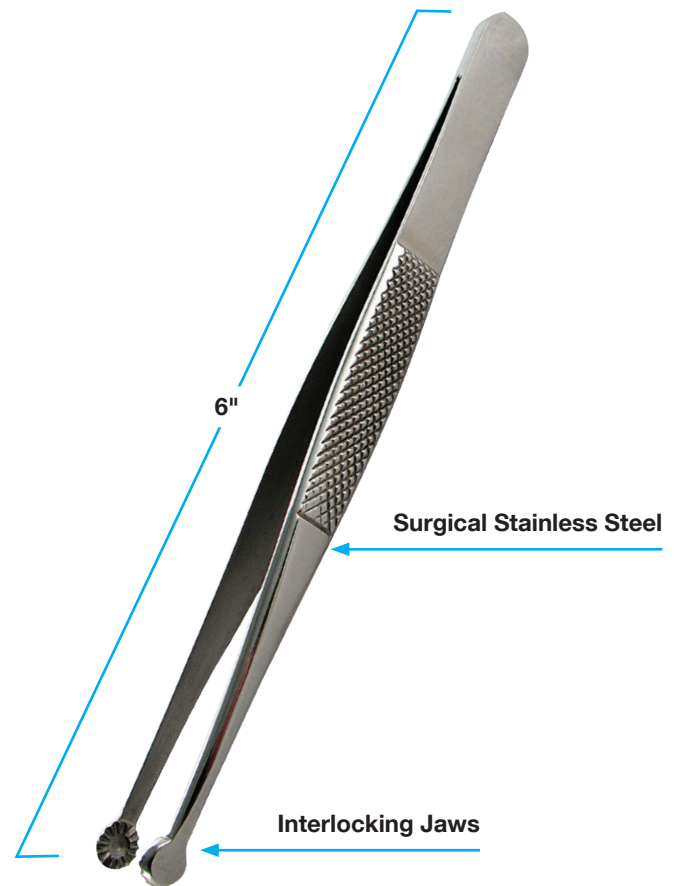

Serrated Interlocking Hands Made of High Quality Surgical Steel for Gripping, Biting and Cleaning Applications

The Spade-Relay Terminal Chaser™ is the first product of its kind, featuring interlocking serrated teeth at the end of a 6 in. handle made from surgical stainless steel. This innovative tool is designed to be strong like pliers with the precision of tweezers. The serrated teeth provide unparalleled holding power and are excellent for grabbing small objects in hard-to-reach areas such as fuses, pins, gaskets, wires and many more.

The Spade-Relay Terminal Chaser™ can also be used to scrape and clean large electrical spades found on relays, fuses and similar applications.

Features and Benefits
